# Course Objectives

- Understanding the purpose and function of the menu options found on the DWAM menu.
- Display the WAM Exceptions Report to verify the actions taken using the options in DWAM.
- Understanding the purpose and function of the menu options found on the WAM menu.
- Display the WAM Exceptions Report to verify the actions taken using the options in WAM.
- Understanding the purpose and function of the menu options found on the MEPRS System Menu.
- Understanding the purpose and function of the menu options found on the MEPRS Realignment Utility.

# Introduction

- Why use DWAM?
- Who uses DWAM?
- How is workload accrued?
- What menus in CHCS are used in the course of my job?

# Why use DWAM

- The DWAM menu allows you to access the enter/edit, inquiry, and print options for the WAM Data Set ID file and the WAM STARS/FL Master Data Elements file, which contains the CAC/JON data (Navy only).
- DWAM is the file and table for workload.
- Correct file and table helps assure for accurate reporting.

# Who uses DWAM?

- MERPS Coordinator
- Date Base Administrator
- Other Authorized Personnel

# How is workload accrued?

Workload is accrued in:

- Clinics when the patient appointment is marked KEPT, Walk-In, or Sick-Call.
- Pharmacy when the label is printed
- Radiology when the procedure is departed and again when the report is verified.
- Laboratory when the tests are certified.
- Inpatient locations when the patient is discharged.
- Ambulatory Procedure Visit (visit count) when the Check-In date/time is recorded.
- Minutes of Service (MOS) are calculated as they are entered.

# Useful Information

- The WAM CORE file is very important to the WAM functionality
  - Contains business rules/guidelines for workload by branch of service for the Fiscal Year
  - File is uploaded annually in conjunction with MEPRS codes file
  - CHCS builds Data Sets IDs (DSI) files based on guidelines in the WAM Core file
  - Software uses information to check MEPRS Codes file for active MEPRS codes./FCCs (Functional Cost Codes) by division and creates data as appropriate
  - New year files will not overwrite previous year

# SDMT

Site Definable MEPRS Table Maintenance

# MEPRS Business Rules

- A unique MEPRS code is the combination of the MEPRS code and a DMIS ID.
- An active MEPRS code in CHCS has a valid DMIS ID assigned to it.
- CHCS treats any active MEPRS code without a DMIS ID as an inactive MEPRS code.
- WAM does not report workload for inactive MEPRS codes.
- A DMIS ID is a unique code. The DMIS ID Codes file has no duplicate codes.
- The 'DMIS ID' field is view only and cannot be edited through the MEPRS Enter/Edit (SDM or SDMT) option after initial entry.
- When a DGA* MEPRS code is entered or edited in the Hospital Location file, CHCS screens it at the group level, rather than at the division level.
- Within WAM functionality, MEPRS codes are now referred to as "FCCs". However, the term "MEPRS code" remains in use throughout the rest of CHCS.
- The DMIS ID immediately follows a MEPRS code/FCC display in CHCS.

# MEPRS Business Rules (cont.)

- **Navy Only:** For STARS/FL, MEPRS codes for child divisions that lack an Operating Budget-Unit Identification Code (OB-UIC or DCWID) must be a unique fourth-level MEPRS code within the Parent division and any of its child divisions that lack an OB-UIC. For example, MTFs with civilian facilities MUST use unique fourth-level characters for the MEPRS codes relating to their civilian facilities. This is because the civilian facilities lack their own OB-UIC or DCWID.
- Army: MTFs with civilian facilities must use unique fourth-level characters for the MEPRS codes relating to their civilian facilities. The MEPRS code must be unique within the Parent division and all its child divisions. This is due to the existing financial system where all child divisions using the same MEPRS codes (such as BAAA) will have the data roll up to one MEPRS code.
- All Services: Refer to Appendix F (File and Table Steps for External Partnership Divisions) of the DWAM Desktop Guide for the recommended steps for sites building a new External Partnership Divisions where there is an agreement to report professional services only in CHCS.

# EMRT

Edit MEPRS Replacement Table

# EMRT

- MEPRS Replacement Table will search for a code to automatically substitute for an inactive code
- If no replacement code is linked to the inactivated MEPRS code:
  - Prescription is filled
  - No workload is counted
  - Pharmacy Workload Exceptions Report reports the transaction
- EMRT is used to designate a replacement MEPRS code for an inactivated one
- The LAB module checks this file to see if a replacement value is available and associates to replacement code.

## MEPRS Inactivate/Reactivate: Inactivate

```
DIVISION: NAVY INPATIENT DIVISION 22 Jun 2001 1400

Enter MEPRS Code: AAIA/0124
Do you want to inactivate code AAIA/0124? No// Yes

Code cannot be inactivated due to associated hospital locations, providers, or
UIC Default PCMs.

Print MEPRS Inactivation Discrepancy Report and evaluate.

This may be a COMPLEX report.
Device:
```

**MEPRS INACTIVATION DISCREPANCY REPORT**

MEPRS/DMIS: BAAB/0124 INTERNAL MEDICINE CLINIC

The MEPRS code cannot be inactivated for one or more of the below reasons:
- The below Hospital Locations are assigned MEPRS code: BAAB/0124.
- For any provider that has defined the location as a Primary Location or Clinic ID, then the provider will be listed along with either their EDI_PN, PID, NPI.
- If a clinic is set up as the enrolling location for UIC Default PCMs.

These discrepancies must be resolved before the code may be inactivated.

Following site policy, if an approved substitute MEPRS code is identified, authorized users may use the MEPRS Realignment Utility.

| Hospital Location | Associated Providers (EDI_PN,PID,NPI ID) | Clinic's UIC Default PCM |
|---|---|---|
| NI CLINIC1 PS | Adam, Alistar (1223332123/E)<br>Best, Candice (1234567890/E) | N44945, N9013N |
| PEDE DEMO FAMILY P | Smith, Dave (xxx-xx-xxxx/S)<br>Vaugh, Melinda Ann (1243212345/N) | |

Clinic supports a PCM with Patients still assigned

# Question

Use the Data set IDs Enter/Edit (DEDT) option to:

A. Inactivate/reactivate individual Requesting FCCs within a DSI as require.
B. Create inpatient Cost Pool DSIs (e.g., A*X).
C. Create manual DSIs (e.g., EHA)
D. Add Cost Pool Codes as Requesting DSIs
E. All of the above
F. None of the above.

# Question

True or False

Run the CAC/JON – MEPRS File Compare (CCOM) option after the MDE file has been processed into CHCS. If you run it before MDE file processing, every FCC would generate an exception message

# Agenda

- Introduction
- Lesson 1: DOD Workload Assignment Module (DWAM)
- Lesson 2: Workload Assignment Module (WAM)
- Lesson 3: MEPRS System Menu (MPR)
- Lesson 4: MEPRS Realignment Utility (MREA)
- Course Summary
- References
- Questions

# Lesson 2: Workload Assignment Module

- Manage Workload Templates

- System Definition Parameters
- Create Monthly Workload ASCII File to EAS
- Workload Generation Controller

# Lesson 2 Objective

- Understanding the purpose and function of the menu options found on the WAM menu.
- Display the WAM Exceptions Report to verify the actions taken using the options in WAM.

    3       Display Exceptions Report
    4       Manage Workload Templates
    5       System Definition Parameters
    6       Create Monthly Workload ASCII File to EAS
    7       Create Monthly Workload ASCII File to STARS/FL
    8       Workload Generation Controller

Select Workload Assignment Module Menu Option: 8
```

# WAM Generator Controller Reports

- WAM Templates
- WWR
- LAB, RAD, and PHR MEPRS Group Reports
- PAD Monthly MEPRS Report
- PAS Monthly Statistical Report-Summary Format

  **Note:** If EOD processing is still outstanding, the Delinquent EOD Processing Report prints instead.
- Roster of Kept APV Appointments

# WAM Generator Controller Business Rules

- WGC can only be used for a prior month
- Must be logged into a lead division to use the WGC
- WGC can only be scheduled to run during non-peak hours (e.g., 1700 to 0400).
- Only one WGC task can be scheduled per night, regardless of the reporting month
- Security Key needed: DGNAS WAM GENERATION
- You must enroll in the WAM GENERATION mail group to receive WGC completion bulletins.
- WGC does not generate the WWR ASCII file for transmission. The WWR POCs must still generate the file manually through the Create Worldwide Workload Report in ASCII format (CMF) option.
- WWR POCs should belong to the WAM GENERATION mail group.

# The Mail Message

```
Subj: Worldwide Workload Report  Fri, 22 Nov 2002 13:56:23  1 Line
From: POSTMASTER (Sender: ANDES,ANN) (Postmaster in SMEMGR) in 'IN' basket.
     **NEW**
□□□
```

# Special Alert

- Issue found with some Requesting MEPRS codes missing on the WAM templates starting in Oct 2009 resulting in reduced WAM workload totals.
- Requesting MEPRS codes that have multiple active entries in the MEPRS file global are not being added to the WAM Data Set file.
- Special software package SS_35159 that was delivered 19 February 2010

# What to Do

- Monitor workload:
  - Does WAM workload reporting match subsystem reporting for the month?
  - Did you see a marked reduction in workload reporting that started in October or November?
  - Are WAM Templates missing any Requesting FCC that regularly collect workload?
- Re-transmit EAS files for any month/division that you feel were impacted:
  - Set template status to ‘Reject’
  - Reinitialize template for month/division to get corrected data
  - Reapprove templates
  - Recreate the EAS file

# Question

True or False

If the WWR is recalculated with WAM Initialization, a completion message is sent to the WWR COMPUTATION mail group.

# Agenda

# Lesson 4: MEPRS Realignment Utility

At some sites this task is handled by the Database Administrator or other IMD personnel.

# Lesson 4 Objective

- Understanding the purpose and function of the menu options found on the MEPRS Realignment Utility.

# MEPRS Realignment Utility (cont.)

## Accessing DOD MEPRS Realign Option

```
   DIV     Switch divisions
   OLUM    OLUM Menu
   QPR     Query Print Request
   RPR     Reprint Report
   RTM     Record Tracking Menu
   UDK     UDK Management Menu
   MREA    DOD MEPRS Realign
           Cancel/Modify Print Request
           Continue
           Display User Characteristics
           Edit User Characteristics

           Halt
           How Did I Get Here
           MailMan Menu
           Restart Session
           Time

Select Core Application Drivers Menu Option: MREA
```

# MEPRS Realignment Utility (cont.)

```
Enter OLD MEPRS CODE:  BAAC/0124    INTERNAL MEDICINE CLINIC

Enter REPLACEMENT MEPRS CODE: BAAA/0124     INTERNAL MEDICINE CLINIC

Select associated Hospital Location:  ??
    1    INTERNAL CLINIC #1    NAVY INPATIENT DIVISION     BAAC/0124
    2    INTERNAL CLINIC #2    NAVY INPATIENT DIVISION     BAAC/0124
    3    INTERNAL CLINIC #3    NAVY INPATIENT DIVISION     BAAC/0124

Select associated Hospital Location:   3      (or enter location name)
Select associated Hospital Location:   2      (or enter location name)
Select associated Hospital Location:  <CR>

Enter Effective Date for the Realignment (MONTH/YEAR): 01 May 2007//

This option will substitute/replace the old MEPRS/DMIS pair with the new MEPRS/DMIS pair for the associated
hospital location(s) that you have entered above.

Based upon the effective date, CHCS will also update the following files with the new MEPRS/DMIS pair:
Patient Appointment (pending and past appointments), Schedulable Entities (future schedules), and the Order
(future, pending and pre-active orders).   This utility also converts the Requesting MEPRS code in future,
pending and pre-active orders if the Requesting location is the same as the Hospital location that has the
MEPRS code modification.  As a result of the substitution, the PAS historical workload from the date of the
realignment back to the effective date entered for the realignment will be modified to reflect the new
MEPRS/DMIS pair.

Appointments and workload after the realignment will utilize the new MEPRS/DMIS pair for the associated
clinics.

You have selected to substitute the old MEPRS/DMIS pair BAAC/0124 for the new MEPRS/DMIS pair:  BAAA/0124, for
locations of: Internal Clinic #2 BAAC/0124, Internal Clinic #3 BAAC/0124, with an effective date of 01 May
2007.

Do you wish to continue? No// Yes

Requested Start Date/Time:  T@1700//

Do you wish to inactivate the old MEPRS code?  No//  (Note: This prompt only displays if
                                    the software team inactivate the old MEPRS code.)
```

# MEPRS Realignment Utility (cont.)

```

Requested Start Date/Time:  T@1700//

Do you wish to inactivate the old MEPRS code?  No//  (Note: This prompt only displays if
                                        the software can inactivate the old MEPRS code.)
```

# MEPRS Realignment Utility (cont.)
## Behind the Scenes

- Hospital Locations
  - Any provider that has defined that location as a Primary Location or Clinic ID will now have the new MEPRS/DMIS pair for that location
  - If the location is a “clinic” location type and it is set up as the enrolling location for UIC Default PCMs, the new MEPRS/DMIS pair is now associated with that clinic

- Other Files Updated by the MEPRS Realignment Utility
  - Patient Appointment (pending and past appointments based upon effective date)
  - Schedulable Entities (future schedules)
  - Order (future, pending, and pre-active orders)
  - Telephone Consults (excluding completed or deleted T-Cons)
  - Clinical User Preferences

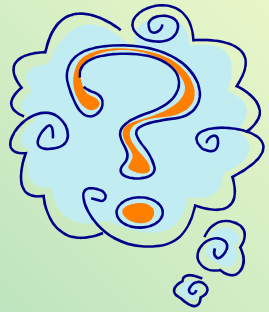
# Question



True or False:

The MEPRS Realignment Utility will have a conversion for  the Patient Appointments (pending and past appointments), Schedule Entities (future schedules), Order (future, pending, and pre-active orders), Telephone Consult (excluding completed or deleted consults), and the Clinical User Preferences files to substitute the old MEPRS/DMIS pair for the new MEPRS/DMIS pair for the selected hospital location.
